SCHEUBERTS POVERTY. With the one slight exception of being sudowed with a good voice during his boyhood, all circumstances seemed to be against the career of the composer. Beethoven, Mozart, and Haydn, although poor, had the advantage of some education, and of personal contact with polite society; Schuebert's lack of education (beyond common branches) and, later, his uncouth manners and weaknesses, of which excessive drinking was not the least, debarred him from making friends among the most cultivated piroles, save in a few cases,

where genine was perceived by keener indement than usual. It seems a contradiction that at one portion of his youth (at eighteen) he should have become a school teacher; but it must be remembered that at that time the position of a village school mater was one of the very lowest, and often the master was scarcely less ignorant

than the school he instructed. Pitiful anecdotes of the extreme poverty of his youth abound; and his privations far exceed those of any of the masters, although the history of art is full of such trisls. He suffered for sufficient food, he was meanly clad (save while a boy-singer at Vienna); he had not money enough to buy the music paper on which to write the thoughts that filed his brain.

There is a letter in existence, in which he implores his brother to send him a few kruetzers, that he may suffer less from hanger. What wonder that when he, in later days, had a little money, he should have taken to drink? Such rigorous life was sure to make either a miser or a profligate. If we search through Grubb street of the last century we will find many English geniuses treading the same path, and even De Quincey offers a similar excase for a somewhat similar weakness.

One effect of the poverty of these years in Schnebert's life was that some of his werks were irretrievably lost. He was in the habit of sometimes borrowing small sums by leaving the score of an opera, or similar works, in pledge with the creditor, and many of these were afterwards used to kindle fires, and for menial purposes.

His parents were not in sympathy with his career either as teacher or as composer, but desired him to enter the military service. - Louis C. Elson.

THE CYMB LOM.

Supper being over, we went out upon the terrace, on which i y this time the moon was shed ting her silver right, glistening on the vine leaves, and casting sharp, black shadows on the waite rashed walls. Most of the guests dispersed themselves to continue their desert in the vineyard, but I rounined beside the gypnies, attracted by the curious shape of one the instruments on which they played. One of the men was poised before an empty barrel, in lieu, I suppresed, of a table, and on it he had placed a flat wobles the trament, something like a shallow box, almost a yard in width, It was Saturday night in Loadville, Six | but rather less in length. I supposed it to rough miners were playing poker. But as be a stringed instrument, until coming nearer, I discovered that what I had taken for strings were long that strips of glass, arranged in different lengths, In each hand he held little sticks, made something like the hammers in the interior of a piano, and with these he struck the glass keys. Yet to say he struck the keys gives an imperfect impression, for the hammers only trembled and quivered and danced in his fingers like the drops of a fountain failing into the basin below. One note was never long draw out, but vibrated in never-ending repetition, particularly when the air played was slow and melancholy. This instrument is the cymbalon; and in every Hungarian melody there are notes which are only producible in perfection on just this instrument, although first-rate performers can execute a feeble imitation on the plano. - The Argory.
